SKILLS

.NET Core

Django

SQL Server

RESTful APIs

Entity Framework

SQLite

MongoDB

Node Js

PROFESSIONAL EXPERIENCE

Software Engineer Intern - Remote

Dec 2024 – Jan 2025 | Hungary

Tech Vexa

- Worked on the development of web applications using ASP.NET Core, implementing Clean architecture and Entity Framework for efficient data management.
- Developed and optimized RESTful APIs to enhance system functionality.
- Implemented authentication and authorization mechanisms using JWT and Identity to secure web applications.
- Led the integration of Role-Based Access Control (RBAC) to ensure proper user permissions and data security.
- Designed and implemented database schemas using SQL Server, ensuring efficient data storage and retrieval.
- Optimized application performance by implementing caching strategies and asynchronous programming.
- Assisted in troubleshooting and debugging application issues to improve system stability and performance.

Django Developer - Remote

Jul 2023 – Dec 2024 | Uganda, Africa

Zuhan

- Developed Zuhan, a web-based prediction system using Django.
- Implemented authentication and authorization using JWT tokens, ensuring secure user access and data protection.
- Built an admin panel for managing matches, users, and payments.
- Integrated payment handling logic, enabling users to securely deposit and withdraw funds.
- Designed and implemented a role-based access control (RBAC) system, ensuring proper access management for different user types.
- Deployed the application on a VPS server using Gunicorn and Nginx, ensuring high availability and scalability.

Backend Developer Intern - Remote

Jul 2022 – Jan 2023 | United Arab Emirates

MKJ

- Developed a simple web application using Node Js for Backend.
- Worked with Mongo DB, optimizing queries and improving data retrieval efficiency.
- Build RESTful API for seamless communication between frontend and backend services
- Collaborated with Development team to troubleshoot issues.

EDUCATION

ADS Web Design & Development

2022 – 2025 | Islamabad, Pakistan

Virtual University

PROJECTS

Task Management System

- Built using ASP.NET Core with Entity Framework.
- Features user authentication, role-based access, task creation, and tracking.

Simple Attendance System

- Django-based system enabling users to mark attendance.
- Admin can generate attendance reports.

Library System

- Developing a library management system in ASP.NET Core
- Will include book management, user roles, and borrowing functionality.

AWARDS

Scavenger hunt

Ranked 1st in BIIT scavenger hunt event.

Python Competition

Ranked 1st in BIIT programming event.

Chess Competition

Runner up in BIIT chess event.

CERTIFICATES

ASP.NET Core Certification

Hyper Technology

Django Certification

Hyper Technology

Git & GitHub Fundamentals

Courser
